SIG Meeting Musculoskeletal Pain

Date: September 11 (Tuesday) Location: Congress Center (BCEC)

Title: Treatment strategies of musculoskeletal pain

11.00 Introduction

Hans-Georg Schaible, University of Jena, Germany

11.10 – 15.30 Non-pharmacological approaches to chronic pain: rehabilitation approaches (organized by K. Sluka and H.-G. Schaible)

11.10 Overview on principles of rehabilitation medicine

Kathleen Sluka, University of Iowa, USA

11.40 Effects of stretching tissue on inflammation and chronic pain

Helen Langevin, Harvard University, Boston, USA

12.10 TENS: basic mechanisms and clinical applications

Josimari DeSantana, Federal University of Sergipe, Brazil

12.40 Exercise therapy: Mechanisms and clinical applications

Marie Hoeger Bement, Marquette University Milwaukee, USA

13.10 – 14.00 Lunch

14.00 The significance of psychological aspects in rehabilitation medicine

Steven George, Duke Clinical Research Institute, Durham, USA

14.30 The significance of education in rehabilitation medicine

Dave Walton, Western University London, Canada

15.00 Final discussion of topics of first session

15.30 Break

16.00 – 18.30 The Puzzle of Osteoarthritis Pain (organized by J. McDougall and H.-G. Schaible)

16.00 Translatability of animal models and optimising pain assessment in humans

Statement 1: Jason McDougall, Dalhousie University Halifax, Canada

Statement 2: Lars Arendt-Nielsen, Aalborg University, Denmark

17.00 Which pharmacological targets are showing promise and what are we missing? Improving the effectiveness of clinical trials for OA pain management. Consideration of OA subtypes and comorbidities as confounding factors

Statement 1: Anne-Marie Malfait, Rush University Chicago, USA

Statement 2: Hans Gühring, Merck, Darmstadt, Germany

Statement 3: Hans-Georg Schaible, University of Jena, Germany

18.30 End

Hans-Georg Schaible

Kathleen Sluka

Jason McDougall
